FolderMatch

FolderMatch compares and synchronizes any two-folder trees or two files. Winner at the Shareware Industry Awards for three consecutive years, SIA nominee for the "Best Overall Application" & nominee for the European Epsilon Award.

FolderMatch makes it quick and easy to compare and synchronize the contents of any two files or folders. Whether you're trying to keep files and folders organized on a desktop computer, performing backups to removable disks, synchronizing rapidly changing laptop data with your main computer, or doing network file maintenance, FolderMatch offers one-button synchronization for the novice, and a range of sophisticated tools for the advanced user.

Single user	$36	
2 to 9 computers	$30	
10 to 24 computers	$27	
50 to 99 computers	$20	
100 to 199 computers	$17	
200 to 400 computers	$13	
Home License Upgrade	$21.99	
Unlimited computers (single site)	$5000	

FolderMatch Upgrade per license $18
Lifetime Upgrade Assurance Plan $49.95
FolderMatch Home License Add-On $21.99
FolderMatch/ FolderClone Standard Bundle $55

Lifetime Upgrade Assurance: When you purchase a Lifetime Upgrade Assurance license you get all future versions of FolderMatch for free. You don't need to pay for updates any longer. One Lifetime Upgrade Assurance license applies to one computer. If you have multiple computers running FolderMatch, you need to purchase a separate Lifetime license for each one.

Home License: When you buy FolderMatch, our terms allow you to use it on one computer. If you have multiple computers in your home that you wish to use it on, you need to buy multiple copies. An alternative to buying separate licenses for each computer is to buy one Home License add-on to your current license. This add-on license allows you to use a single FolderMatch license on all the computers in your home.

Comparison features

- Compares files or folders (including sub-folders) between drives, hard drives, CD-ROM drives, and network drives (UNC paths supported)
- Supports the following file systems: FAT, VFAT, FAT32, HPFS, NTFS, CDFS, and UDF
- Offers choice of eight comparison types: Filename Only, Size Only, Size and Date/Time, Contents, Attributes, Version Stamp, CRC32, and SHA-1Supports HUGE files (> 4 GB)
- Compares only files and folders that match Include and Exclude filter pattern lists which you define (wildcards supported)
- Include/Exclude, System and Hidden Files Handles NTFS and FAT timestamp incompatibilities
- Allows for user-specified number of bytes (chunk size) to be read and compared during a Content, CRC32, or SHA-1 comparison.
- Shows text differences between two ASCII text files, Microsoft Word documents, Excel Spreadsheets, RTF documents, or *Adobe PDF documents. (MS Word, MS Excel, and Adobe Reader not required)

Synchronization features

- Single-click auto synchronization
- Guides through the process using helpful wizard screens
- Offers choice of nine preset auto-Synchronization methods, or a user-defined custom method
- Supports Copy, Move, send to the Recycle Bin, and Delete Permanently operations for manual synchronization
- Allows for the creation of new sub-folders
- Renames multiple files and folders
- Synchronizes the dates/times of two files
- Sets the date/times of multiple files

FolderClone Standard

FolderClone is designed to provide fast, flexible and easy backup, synchronization, replication, and mirroring of important files on most storage media. FolderClone is beneficial to individual users, small businesses (SOHO), and large corporations. Individual users will find FolderClone essential for backing up their data files and/or synchronizing their laptops to their desktops. For large enterprises and small businesses alike, FolderClone is part of the network infrastructure needed to maintain high file availability, protect your files, and share files throughout your organization.

FolderClone arranges your synchronization needs in sets of "tasks". A task is a set of specifications which tells FolderClone what files/folders you want to be copied, where you want them copied, and how often you want this done. Once configured, FolderClone compares the "source" folder against the "target" folder at the user defined time intervals. Changes or additions to the source folder are copied to the target folder. Files and folders which exist on the target folder but not on the source folder are deleted. (Optionally, the deletion can be turned off). This process runs automatically in the background without any further user interaction required.

Single user	$29.95	FolderClone Upgrade per license $15
2 to 10 computers	$23	
11 to 50 computers	$19	
51 to 100 computers	$15	
Home License Upgrade	$21.99	
Server license	$279	
Unlimited computers (single site) $1500		

FolderMatch/FolderClone Std. Bundle $55

Features:
- Easy to use Interface for simple creation and maintenance of synchronization tasks.
- Four file comparison methods: Date/Time, Size, Contents, and CRC32
- Uni-directional synchronization, replication, mirroring of data from Source folder to Target Folder
- One-to-many synchronization is supported. One Source folder may be synchronized with multiple Target folders.
- Multiple Copy Options: Including the ability to maintain the source file's create timestamp, and a Safe Copy option, which ensures that the target file is not deleted unless the copy operation is successful.
- Four Delete Options: Delete Permanently, Send to Recycle Bin, Do Not Delete, and Secure Delete.
- The Secure Delete option wipes the data from the disk so that the file cannot be restored by an undelete utility.
- Loads at Windows Startup and resides in the System Tray
- Runs unattended in the background and checks folders at user-defined intervals
- Interval options include: Manual, Every Few Minutes, Every Few Hours, Every Few Days, and Selected Days.
- Process Priority rules can be defined to allow control of CPU utilization during certain hours of the day.
- Can Ignore the FAT/NTFS timestamp issues of "2 second difference" and "daylight savings time difference"
- All synchronization activity and errors are logged. Or optionally, only errors are logged.
- User can determine log size limit
- Scheduled synchronizations can be paused
- In-Progress synchronizations can be cancelled
- Folders can be compared, and an HTML-formatted report generated
- Lists of synchronization "Tasks" can be Created/Loaded/Saved
- Batch execution of multiple synchronization tasks in a user-specified order
- UNC file path names supported
- International date format support

FolderClone Professional Edition

FolderClone pro provides fast, flexible and easy backup, synchronization, replication, and mirroring of important files on most storage media. Once configured, it monitors the source folders for changes and copies new or changed files to the target. This process runs in the background without any further user-interaction required.

FolderClone pro is beneficial to individual users, small businesses (SOHO), and large corporations. Individual users Will find FolderClone essential for backing up their data files and/or synchronizing their laptops to their desktops. For Large enterprises and small businesses alike, FolderClone is part of the network infrastructure needed to maintain high file availability, protect your files, and share files throughout your organization.

FolderClone pro arranges your synchronization needs in sets of "tasks". A task is a set of specifications that tells FolderClone pro what files/folders you want to be copied, where you want them copied, and how often you want this done. Once configured, FolderClone pro monitors the "source" folders for changes or updates and copies new or changed files to the "target". This process runs automatically in the background without any further user-interaction required.

Single user	**$44.95**	
2 to 10 computers	**$38**	**FolderClone Pro Upgrade per license $22.50**
11 to 50 computers	**$34**	
51 to 100 computers	**$30**	
Upgrade from Standard to Professional Edition	**$15**	
Server license	**$429**	
Unlimited computers (single site)	**$2750**	

Features:

- **Includes all of the capabilities of FolderClone Standard Edition as well as these additional features:**
  E-mail Notifications: Administrators can be notified when a task begin, ends, or is canceled. E-mail notifications can also be sent when errors occur. No Email client is required. Requires the use of an SMTP (outgoing mail) server, everything else is built in.
- **Run a task when first connecting to network:** Laptop users can come into the office, dock their computers, and automatically backup their laptop data to another machine on the network. FolderClone Pro will determine when a valid connection exists between the source and target computers and will initiate a task at that time. No user involvement is required.
- **Copy Open/Locked/In-Use Files:** With FolderClone Professional's Open File Manager, there is no need to close applications during a backup. Most open, locked, and in-use files can be copied. SQL Server database files, Access databases, MS Word documents, Excel spreadsheets, and most system files can be copied with ease. (Outlook PST files are not currently supported) Files must be on local computer and user must have administrator privileges.
- **Application option settings can be overridden for each individual task:** Options are ordinarily set at the application level and are global to all tasks. So, for example, if you choose the 'Do Not Delete' option, this rule is applied when running all tasks. FolderClone Professional gives you the ability to customize most options on an individual task level.
- **Scheduling option allows for FolderClone Pro to "Run On Windows Startup":** Tasks can be scheduled to run when Windows is started up. FolderClone must be set up to startup with Windows for this to work properly.
- **Copy NTFS Security Attributes:** When copying files between NTFS drives, security information such as file ownership and access privileges can be copied along with the file to the destination folder.
- **View File Differences:** Differences between Source and Target file can be viewed. Even binary differences are viewable!

Doppelganger – Duplicate File Finder

Doppelganger is a powerful and reliable tool to find and remove duplicate pictures, documents, music files, and more! Removing duplicates frees up disk space and aids your computer in indexing. If you backup your files, removing duplicates first reduces the storage space required for the backups and the amount of time required to.

Search for Duplicates
Fast duplicate search using reliable, proprietary algorithms that have been tested by millions of users.
Search for files with the same contents or for files with same names/sizes/timestamps.

Scan Multiple Sources
Add multiple drives /folders for scanning.
Both Drive-Letter format and UNC formats are accepted.
Devices such as MP3 players, USB drives, and Digital Cameras that allow drive letter access can also be searched.

File Protection
Ignore protected file system objects such as System/Hidden folders/files and those in the Windows folder path.
Advanced filtering available to allow Include/Exclude of any file/folder.
Duplicates can be removed to the Recycle Bin or other folder on your system for easy restoration in order to test which files are safe to remove.

Single user license $14.95

Easy to Use
Clean, attractive, intuitive user interface design makes for a quick learning curve.
Helpful wizards guide you thru every step of the process.
Duplicates can be quickly marked for removal using a Selection Assistant that allows selection of multiple files based on simple rules such as "keep the newest, remove the others".

Reports and Logs
Scan results can be exported to a text file.
All removal actions and details about problems encountered are maintained in a text-based History Log.

Unicode Support
Full multi-language support for folders/files whose names are in Chinese, Japanese, Arabic, Russian, etc...

Features:
- • Find Duplicate Documents, Pictures, Music, etc.
- • Locate Duplicates with Different File Names
- • Scan Multiple Computers, Drives, Folders
- • Scan External Devices ie.Digital Cameras, MP3 Players...
- • Easy To Use - Helpful Wizards Guide Each Step
- • Supports File/Folder Names Containing Foreign Characters
- • Protects Hidden & System Files from Accidental Deletion
- • Move, Send to Recycle Bin or Permanently Delete Duplicates
